k. Description of proposed amendment: The authorized but unconstructed project consists of: an inlet structure within the western bank of the Deer Flat low line canal; a 42 inch diameter, 900 foot long penstock; a powerhouse to contain two generating units with a combined rated capacity of 650 kW; a tailrace discharging directly into the Fargo High line canal. Now the exemptee proposes a design change that includes two horizontal Francis turbines and a single horizontal generator on a common shaft. The nameplate capacity of the project would increase from 650 kW to 1,100 kW, and the hydraulic capacity would increase from 100 cfs to 110 cfs. The proposed changes will not involve any change in the volume of water currently diverted for irrigation and will generate power using only water released for irrigation purposes.
